

REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 21

THE REDCLIFF REVIEW THURSDAY, MAY 26th, 1932

Doings At Ottawa For The Past Week

The Following Letter Received From Dr. Gershaw, M. P.

About two months ago a bill was brought in making a reduction of ten per cent in the salaries of civil servants. Judges, Members of the Military and Naval Service and Lieutenant Governors were excluded and we were not asked to make a contribution. This week a bill was introduced by which a special tax of 10% was applied to the income tax of Judges and Military officers. A long debate developed over the salaries Judges should get. The Prime Minister stated that he was convinced that the salaries received by Judges was inadequate. He found great difficulty in finding suitable lawyers to accept Judgeships. The Judicial Branch was much more important than the Legislative Branch. Some Judges had written to him stating that they were willing to make a contribution to the Treasury in the time of great stress. The sentiment in the House, however, was strongly in favor of making a deduction from the Judicial salaries. For this reason the Government reversed the first decision. The unfortunate part of the legislation is that the deduction applies to small as well as large salaries and is not graded in any way. It is certainly unfair that many country postmasters who already have suffered a great loss of salary because of the falling off of the sale of stamps should be forced to accept a further deduction of 10%. Deductions have been made on the amounts allowed for rent, but the Minister promised to rebate these sums.

It has been made clear on many occasions that the Dominion Government will give relief only through the provincial Government. This week an order-in-council came down granting a loan of \$140,000 to the province of Alberta for the purpose of making advances to farmers for seed.

The three members of the Civil Service Commission are being retired. This Commission has, for many years, made all the appointments to the Civil Service and the Merit System, and a new commission will be appointed. However some 11,000 positions, including post offices where the revenue is not more than \$3,000 per annum, are being excluded from the authority of the Act. This will mean that the Member, if he supports the Government or, if not, the defeated candidate, will have the appointing of these officers. To that extent there will be a return to the old patronage system.

Plans are being made for the July Imperial Conference. The general opinion is that if we in Canada wish to sell to other countries, we will need to buy from them also. The Manufacturers Association have been asked to study this question, and it is rumored that they are willing to advise the Government to make concessions on some 35 articles. That means that they will not object to the duty in these articles being lowered for goods coming from any part of the British Empire.

Brick & Coal Footballers Have successful Social

Many Prizes Were Won During The Evening

In spite of the several other holiday attractions last Tuesday evening there was a large attendance at the whist drive and dance in Cliff Hall put on by the Brick and Coal football club.

The large number of prizes offered for different events during the evening kept the crowd interested and added much to the excitement and enjoyment of the occasion.

Mrs. Wheeler won the ladies prize in the whist drive and also the special prize for the highest score over all. Mrs. McLaughlin won the ladies second prize and Mrs. A. E. Shaw the third.

The prizes for the most sevens on the tally card was won by Mrs. Richardson. Gents prizes were won by 1st R. Phillips; 2nd, E. Parrup; 3rd, J. Davies. For the most sevens G. Cook won.

In the draw at the door Jean Patterson and Mel Colard drew the lucky numbers and wongood prizes.

There were several other good prizes awarded for novelties and dances.

In the afternoon the girls football club held a tea and sale of home cooking. The assortment of goods offered for sale was of such a splendid quality that no trouble was experienced in making sales and the supply was quickly disposed of.

The hall was well filled for the dance and the music was all that could be desired to make a most successful evening.

The members of the committee are to be congratulated on the splendid manner in which the event was conducted.

In a friendly game with Lethbridge last Tuesday the Medicine Hat Legion football team won out by 3 goals to one.

The one day the baseball teams from both cities played a double header. The first was a tie all and in the second the Hat won out by 10 to 2.

The members of the committee are to be congratulated on the splendid manner in which the event was conducted.

There is more love than hate more hope than fear, in the mixed murmur of the human heart.

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday at 8:30 a.m.

ST. AMEROSCH CHURCH

Rev. Male in Shaw at 8 a.m. Holy Communion 10 a.m. Sunday School 11 a.m. and 3rd Sunday 11 a.m. Holy Eucharist 2nd, 4th and 5th Sunday 11 a.m. Matins and Sermon 7:30 p.m. Evensong and sermon

UNEMPLOYED BRING GRIEVANCE TO COUNCIL

Want Foreigners Deported To occupied by Mr. Riese. As Make Room For Britishers

There were quite a number of unemployed, both married and single, in attendance at the council meeting last Monday evening in the hope of getting some assistance by way of either relief or employment.

The complaint of the married delegation was that foreigners were being employed in our industries while British Subjects who were property owners and tax payers were being refused employment. They did not think this was fair or reasonable and asked the assistance of the council in having what is termed an injustice, remedied.

One suggestion made by the delegation was that the council take steps to have these foreigners deported, but council did not feel disposed to take such drastic action and suggested that the delegation take the matter up with immigration department and the federal member of this constituency. This the delegation decided to do and the matter was dropped.

The single men are tired of either work or direct relief and were informed that council had no work under contemplation and that the period for direct relief was now drawing to a close.

On motion of councillors Hargrave and Evans the secretary was instructed to write the Minister of Public Works Works Edmonton, asking that the single unemployed here be given employment in the work camps.

Mr. Van Wort asked on council an offer of \$8,000 north of building on Broadway recently

Brick & Coal Win First League Game

Defeat Callies in 2-0 Game Here Wednesday

Despite the cold weather there was a good attendance at the first league game played here last evening between the Callies and the Brick and Coal. The game was slow and uneventful but it was due largely to the disagreeable weather. The Bricks won out by 2 goals to 0, scoring one in each period.

The Callies started off well and after a few minutes play were only stopped from scoring by the clever work of Hope between the Bricks' goal posts. This had the effect of wakening the Bricks up and five minutes later they scored. For the balance of the period play was even, but no one scored again.

The second period had only nicely begun when the Bricks scored again and they held their two goal lead to the finish.

A tea clinic will be held in Gordon Memorial school room on Wednesday, June 1st at 2 o'clock in the afternoon.

Instructions were given to have suggested changes embodied in the agreement and copy of same forwarded to the Utility Commission for approval.

A letter was read from the depot at Edmonton notifying council that a weed inspector should be appointed. Mr. Kitchen was then appointed for Redcliff.

Wm. West wrote offering \$75 for house on fourth street. The offer was accepted.

It was decided to hold the Court of Revision on Monday, June 6th, same to be held in council chamber at 8 p.m.

Third Draw Game McLellan Cup Final

Will Make Another Attempt on Friday Evening

Another attempt was made last Friday evening to decide the winners of the McLellan cup but it ended in a draw as the game was another draw between the Legion and the Diamond D's. The score was 1-1. This was the third draw in the finals in this event.

A nasty wind again spoiled the game considerably but this did not dampen the ardor of the players of both teams.

efforts to settle this long overdue competition. The play was very evenly divided throughout, both teams taking full advantage of the wind when in its favor. The Diamond D's won the toss and played with the wind which was so strong up the field that on one occasion a goal kick from the south net went the full length of the field for a goal kick at the other end, without another player touching it.

In this period the ball in-curred all around the Legion goal throughout but it was not until the half was advanced that he Diamonds scored the only goal of this session.

With the change over the Legion kept the ball well in the goalers territory and it was not long until Woberley equalized with a nice shot from close in which Thomson could not reach.

From this on both teams worked hard to notch the winning goal but to no avail and another draw was the result.

The replay is set for Friday evening of this week and will be played in Medicine Hat at 6:15.

Bungalow Camping in Rockies

Spring is here, according to the calendar, though you may not otherwise have noticed it, and with the spring the thought of vacation begins to gather strength. In another month or six weeks the bungalow camps of the Rockies, famous the world over for their beauty, will have opened again for the season. Outstanding among them are the Lake O'Brien bungalow camp (lower left), just behind Lake Louise; Yoho camp (lower right), under the foot of the Takakawa Falls; and Emerald Lake camp (upper), by many considered to be the gem of the Rockies, although artists and others will often contend that Lake O'Brien is a close rival. Stays at reasonable cost may be made in any or all three of these camps, since they are not very far from one another and are easily accessible. As a by no means minor part of the lure of these camps there is the attraction of trail riding on trained, sure-footed mountain cayuses through some of the most magnificent scenery in the world. Centre inset are the famous Twin Falls near the Yoho Camp.

Local Softballers Have Busy Week

Win Two League Games And Lose One

During the past week the Red Cap softballers have had a busy time. Sunday afternoon they defeated an all star town team and in the evening they won a league game in Medicine Hat from the S.A.R. These same two teams met again Wednesday evening in the Hat in a league fixture and again the Red Caps won out in a closely contested battle, the score at the finish being 2-1.

On Monday evening they met the Medallists and lost out by the shot end of a 6-1 score. In this game costly errors accounted for several runs.

These games are becoming quite popular with the fans who turn out in large numbers.

On Friday evening of this week the Red Caps play the Moose team here at 6:15 and they play the New Club Cafe here Sunday afternoon.

The annual church service for graduating nurses in the Medicine Hat hospital will be held in St. Barnabas Church on Sunday, May 29th. Graduating ceremony will be held in Fifth Ave. Church on Thursday, June 2nd. An invitation is extended to Redcliff citizens to attend on both these occasions.

How is Your Subscription?

More Optimism Is Prevalent In Dominion's Western Northland Than In Other Parts Of Canada

Canada's western northland faces the coming year with more optimism than any other part of the Dominion. Development and activities in mining and aerial transportation during the past year indicate the opening of a new and prosperous epoch on the fringes of the Arctic Circle.

Rich and vast deposits of radium-bearing ore and equally rich deposits of silver have been discovered at Great Bear Lake, 1,000 miles north of Edmonton, Alberta. Indian deposits at Labine Point and silver deposits at Rich Bay have proved to be very valuable and could easily meet the high cost of transportation—\$400 per ton, states Dr. Hugh H. Spence, Mineral Technologist of the Federal Department of Mines, in his report of his survey of the Great Bear Lake district.

Continued expansion of aerial transport and passenger service is bringing these rich mineral fields within easy distance of the outside world. Waterways, Alas, 300 miles north of Edmonton, is the nearest railway point, and ore is now shipped here from the mines. In addition, one of the largest airplanes in Canada, a Junkers machine built for Canadian Airways, Limited, for service in the north, is now carrying freight ore and supplies from the mineral fields this winter.

A flying base has been established at McMurtry, and weekly mail deliveries are made from there to Akivik, 1,500 miles north. The schooner, costing from \$3,000 to \$7,000 each, provide floating summer homes as the people move about the delta or along the Mackenzie. Credit to the natives and trappers has been cut down this year and fur prices are lower than usual, but they have ample supplies, and a good crop of fur is expected.

Canada's far north country is becoming more and more self-sustaining. Wild game provides plenty of meat for the skilled hunter and each man grows his own vegetables. The crop along the Mackenzie River last summer was the best in years. Health prevails everywhere. Doctors are the only professional men in the north, would starve if they were not hired by the government to give medical attention to the Indians and Eskimos. It is said.

The Northwest Territories cover two-fifths of the total area of Canada, but there are only about 1,000 whites and 5,000 natives throughout the whole country. An influx of prospectors, mining men and tourists, however, is expected in the coming summer, owing to the interest surrounding the Great Bear Lake discoveries. Activities in this area last year increased freight along the Mackenzie River. More than \$10,000 was expended on road building and improvements at Smith Portage, a 10-mile portage on the Mackenzie River near Fort Smith. Preparations for an active year in this district during 1932 are now underway.

Hudson's Bay Company river steamers, formerly only used for the transport of their own cargoes and the company employees, now are available for tourist travel.

Northward the tide of empire certainly makes its way. Since the time Peter Bond established a port at Lake Athabasca before 1800, when southern Alberta, British Columbia and Saskatchewan were unexplored for many decades the tide flowed sluggishly. In recent years, however, there has been a quickening of the current, the result of which is plainly evident and which will become more so when the spring break-up raises the temporary barrier into the northland.

Other attractive fabrics for its development are wool jersey, wool crepe, wool challis and tweed-like cotton. Price of pattern 25 cents in stamps or on card (in a preferred). "Wrap coin carefully."

Canada Has Advantages

Geographical Position Shows Dominion Source of Produce For Consuming Countries

Describing what he believed to be Canada's geographical advantages as a source of produce for the consuming centres of the world, Hon. R. J. Manion, Minister of Railways and Canada, and Acting Minister of Trade and Commerce, in an address at Ottawa, expressed himself as most emphatically of the opinion that this country would take great strides in trade and commerce as soon as economic conditions improved.

Dr. Manion was addressing a joint luncheon of the Ottawa Board of Trade and the Eastern Canada Fruit and Vegetable Jobbers' Association.

Will Golfers Discard Bags?

New 1932 Trend May Do Away With Caddies

The 1932 model set of golf clubs is the latest, an innovation which aims to reduce materially the weight of the golfer's kit and possibly threatening the doom of the game's oldest institution—the club trolley.

This new invention, a detachable shaft, enables a player to adjust the shaft lightly on any type of head from a putter to the woods, with another designed for the niblick. The idea of two-piece clubs has been tested before, but that was in the days of the hickory shaft when the screw arrangement proved unsatisfactory.

Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which was organized last year, is now in a position to take action against the publishers of the city. The union has been successful in securing a reduction in the price of newsprint, and has also been successful in securing a reduction in the price of advertising space.

By Annette

Canada's far north country is becoming more and more self-sustaining. Wild game provides plenty of meat for the skilled hunter and each man grows his own vegetables. The crop along the Mackenzie River last summer was the best in years. Health prevails everywhere. Doctors are the only professional men in the north, would starve if they were not hired by the government to give medical attention to the Indians and Eskimos. It is said.

The Northwest Territories cover two-fifths of the total area of Canada, but there are only about 1,000 whites and 5,000 natives throughout the whole country. An influx of prospectors, mining men and tourists, however, is expected in the coming summer, owing to the interest surrounding the Great Bear Lake discoveries. Activities in this area last year increased freight along the Mackenzie River. More than \$10,000 was expended on road building and improvements at Smith Portage, a 10-mile portage on the Mackenzie River near Fort Smith. Preparations for an active year in this district during 1932 are now underway.

Hudson's Bay Company river steamers, formerly only used for the transport of their own cargoes and the company employees, now are available for tourist travel.

Northward the tide of empire certainly makes its way. Since the time Peter Bond established a port at Lake Athabasca before 1800, when southern Alberta, British Columbia and Saskatchewan were unexplored for many decades the tide flowed sluggishly. In recent years, however, there has been a quickening of the current, the result of which is plainly evident and which will become more so when the spring break-up raises the temporary barrier into the northland.

Other attractive fabrics for its development are wool jersey, wool crepe, wool challis and tweed-like cotton. Price of pattern 25 cents in stamps or on card (in a preferred). "Wrap coin carefully."

Prize Wheat

Varieties Of Grain To Grow Which Have Best Chance Of Success

In order to win highest prizes in seed fairs and grain exhibitions, it is necessary to grow those varieties which have the best chance of success, and, unfortunately, the varieties ordinarily grown for commercial purposes in Saskatchewan are those which show well in competition. A statement to this effect was made by S. H. Vigor, Saskatchewan field crop commissioner, in recommending the following varieties as being not only suitable for general field use, but the best for general field use, his recommendations being based on long experience as supervisor of Saskatchewan exhibits at important national and international shows.

Wheat: Hard red spring, Reward and Marquis; Durum, Minot.

Oats: Standard, Victory, Early Gopher.

Barley: Two-rowed, Hanchett; Three-rowed, Alcester. Oats: 21 for mulling purposes, but not satisfactory for exhibition purposes as the brighter colored six-rowed.

Rye: Bion, a new, large-seeded, high-yielding, wintering variety. Rye: Spring, Prosper, tall, Dakota. This cannot compete in seed shows with Ryeen rye, which is non-hardy to Saskatchewan.

Deportation Rulings

Minister Of Immigration Must Review Each Separate Appeal

The judgment of the Montreal court which ruled the Minister of Immigration must review each appeal from a deportation order will add materially to the duties of Hon. W. A. Gordon, who administers the department. During the past year Canada deported about 4,000 persons and in each case, whether expelled from or not, the department at Ottawa reviewed the evidence. The judgment of the court would oblige the minister himself to perform this duty.

Whether the Dominion will carry the judgment to a higher court could not be known. If this step were taken, it would be believed possible the government would amend the legislation at the next session of parliament, specifying some departmental official, such as the Deputy Minister, to review all cases.

Canadian Tobacco

Simcoe Shipment Includes Types Put On Market In Great Britain

Agricultural officials at Simcoe, Ontario received a consignment of "Canadian Club" tobacco, which was recently put on the market in Great Britain by one of the leading British firms. A dozen or more types of tobacco are included in the shipment. The manufacturers are the first in Great Britain to place a strictly Canadian brand on the market, and Ontario tobacco growers are closely watching their success which has been most encouraging to date.

The tobacco, according to the officials who have smoked it, has a distinctive and pleasant flavor, unlike the American product.

Seven ex-monarchs living in exile are estimated to possess between \$15,000,000. Of this, the ex-Kaiser, who is the richest German, owns \$12,500,000.

AS GANDHI CAME HOME TO JAIL

Absorbed in spinning threads for housewren garments, Mahatma Gandhi, famous Indian leader, is shown on the deck of the "Pillana" as the ship neared Bombay. The seal "prophet" of India was greeted by a riot between supporters and opponents, which took five persons were injured. Shortly after his arrival Gandhi was imprisoned once more in Poona jail from which he is directing a new campaign of civil disobedience, which British officials are putting down with stringent methods.

Canada Producer Bending

Energies Forward

"The markets for Canada's agricultural products for the future, viewed in the light of the present, seem to depend upon quality as well as quantity of production," observes Dr. J. H. Grisdale, Federal Deputy Minister of Agriculture. "Canadian producers are evidently becoming more and more conscious of this situation, bending their efforts toward the improvement of the quality of their products. Many of our agricultural products going overseas command a premium on the British and other markets." Dr. Grisdale also points out that prices for all agricultural staples are now on an export market basis, and that while these are probably not quite so satisfactory as they might be, production is definitely expanding and the farmer knows exactly where he stands relative to prices, that is to say: Canadian prices are high and are not likely to be seriously affected by any consistent increase in production.

Prepare Year Ahead

For Dry Land Garden

Result Of Experimental Work Carried Out At Lethbridge

Experimental work at Lethbridge, Alberta, shows that to ensure a fair measure of success in the kitchen garden on the dry land farm it must be prepared at least one year ahead. Superintendent W. H. Fuisfield, M.S.C., L.L.D., in his annual report just issued points out that it is desirable to reserve two acres the area desired; to apply well rotted manure to the part to be sown; to plant the garden in the autumn; to cultivate just enough to curb weed growth; to plough about eight inches deep to make room for the manure; to permit the use of the land cultivator; and to provide a suitable windbreak on the windward (not necessarily the northward) side of the permanent garden site. Vegetables in a dry land garden usually mature earlier than on irrigated land.

Cost Of Producing Hay

Cost Estimated At Central Experimental Farm At Ottawa

The annual report of the Dominion Field Husbandry Experiment Station, B.S.A., M.B., Ph.D., contains an interesting reference to the cost of producing hay. The cost of producing hay at the Central Experimental Farm, Ottawa, was \$4.14 per acre. The yield was 4,144 bushels of hay. The cost of the crop to the producer was \$4.43, leaving a profit of \$11.55 per acre. Considered as return on manual labor the total payment on this item would be at the rate of 72 cents per acre for production and marketing. However, had the crop been marketed there would have been a further labour cost of \$2.96 per ton.

The beautiful Tyrian purple dye is made from the glands of Mediterranean sea snails, of which about 200,000 color the bath.

An electrically driven machine now chops the hay crop, removes its moisture, and blows it into mows.

Probably women will quit driving from the back seat when men quit cooking from the dining room table.

Canada Is Weathering This Period Of Difficulty In Favorable Manner According To Economist

Donald M. Marvin, economist, writing on Canadian business conditions in the Royal Bank of Canada monthly news letter, says Canada is weathering this period of difficulty in a favorable manner. We reproduce his article in part.

"The Canadian business situation at the end of 1931 reflects the difficulties resulting from two years of worldwide depression. There are few industries which have not been seriously affected. The decline in the price of agricultural products has been particularly severe and the difficult situation created by these conditions was further aggravated by drought in Western Canada. Gold production has continued to expand and the record established by the 1931 output of the outstanding features of the year. Industrial activity and construction work have maintained in reasonable volume and manufacturing has suffered less contraction than in many other countries. Canada, however, is dependent upon foreign markets for a large part of her products and has recently felt the decreased purchasing power of many of her customers. In addition, Canadian industrialists have had to contend with the confusion resulting from numerous fluctuations in her foreign exchange relationships.

The volume of agricultural production was considerably reduced as a result of the drought conditions in the Prairie Provinces, particularly in the southern sections of Saskatchewan. Wheat and other crops were severely damaged and farmers in the affected areas did not harvest sufficient quantities to meet their own requirements. Alberta and the northern districts of Saskatchewan and Manitoba have been more successful, but the Western wheat crop alone is 100,000 bushels smaller than the 1930—a year of moderate harvest only. Conditions in Eastern Canada and British Columbia were more favorable and some crops created new records. Apples and potatoes are plentiful in their disposal has presented a problem; the tobacco crop in Ontario is a bumper one of splendid quality. Prices for all farm products have declined to very low levels and with the reduced crops in the West, the value of Canadian field crops required serious reduction from the previous years, being officially estimated for 1931 at \$431,250,000 as compared with \$611,585,000 in 1930 and \$698,900,000 in 1929.

Livestock and dairy farmers have excellent pasturage and plenty of feed for their herds. Increased interest in dairying has been shown in Alberta and Saskatchewan, and butter production has been greatly expanded. In Saskatchewan, output for the first ten months of the year exceeded 17,000,000 pounds, an increase of 38 per cent. over the corresponding period of 1930. This total is greater than the highest previous full year's output for Saskatchewan, viz. 16,635,000 pounds in 1928. Large quantities of butter from Canada to Great Britain were resumed in substantial volume after a lapse of some years. The total quantity shipped during the twelve months ended October 31st, amounted to 9,922,600 pounds against 1,317,400 pounds in the previous year. The export of cattle to England has also been heavier than in many years. Irish shipments were also made to France and Belgium. In order to provide a regular supply of high-grade stock for the export market, the Ontario Government has arranged for the finishing during the winter of selected animals from Western Canada by Ontario farmers.

Supplies of wheat are still large but are somewhat reduced from last year. Export shipments increased in volume towards the end of the year and prices have shown an upward trend. A substantial reduction in the large world stocks of wheat and the return of prices to a profitable level will do much to re-establish Canadian agriculture on a satisfactory basis.

The rapid expansion in gold output was the outstanding feature of the Canadian mining industry last year. In 1930, the value produced was \$49,433,600; for 1931, the total was for all Canada is placed at \$55,000,000. Ontario production alone equaled the Dominion total in 1930. Quebec, the second largest gold producing province of the Dominion, doubled its output, the total reaching \$6,000,000 as compared with \$2,930,170. Manitoba and British Columbia also reported increased production. Established mines greatly expanded their output during the year; mill capacities were

increased and great improvements made in methods of recovery. New mines have entered the ranks of the shippers, and, in several instances, old properties, where production had become unprofitable, are again being worked. Exploration and prospecting work have been pushed forward vigorously and many promising finds have been reported in new areas in Quebec, Ontario, Manitoba and British Columbia. The prospective development of these areas promises continued expansion in this industry.

Canada has been fortunate in maintaining her production and general business activities at present levels when other countries are faced with conditions of the greatest difficulty. Unemployment and its accompanying evils have not been so serious in Canada than in most countries. Promising features in the present economic outlook include the healthy condition of savings deposits, the strong technical position of Canadian manufacturers and a prosperous gold mining industry. Promising general features of trade has been reflected in the falling off in the volume of current loans and foreign house returns. The most difficult situation in Canada is that of agriculture. A revival of world trade and a return of profits to agriculture would give very general prosperity to this country, but Canada is weathering this period of difficulty, a revival of world trade will be in an admirable position to participate in the first material advance.

Valuable Musical Instruments

Worth More Than a Quarter Million Dollars, May Be Secured For Canada

Canada, within the near future, may secure possession of four of the most valuable musical instruments in the world. Two violas, a cello and a viola, valued at more than a quarter million dollars, and which are considered among the finest works of Anton Stradivari are for sale in New York.

The instruments were brought to this country by Emil Hammer, noted expert of Berlin. They are owned by the Phillips-Mendelsohn family of the German capital.

As a gesture of international friendship the instruments were loaned to the Hart House String Quartette of the University of Toronto. Recently the quartette entertained the Canadian Club.

Following the performance a distinguished Canadian voiced the suggestion that efforts should be made to secure the instruments in the German capital.

Criticism of the modern economic system was voiced by Rev. E. H. Oliver, D.D., of Saskatoon, moderator of the United Church of Canada, preaching in St. Andrew's Wesley Church at Vancouver recently.

Contrasting the work in some parts of the prairies with the abundance of produce in parts of Ontario, where fruit had been left on the trees to rot, he found reproach for modern conditions in that it never occurred to anyone to use the abundance to relieve the want.

He said one day it would occur to some, perhaps one day it would occur to legislators and then they would bring relief to misery and distress. "In the new day to come it will not do to have abundance in one corner and want in another," Dr. Oliver declared.

The thrush wren from sugar cane is being made into feeding humber, that is strong, tough, and light in weight.

Cost Of Our Pork Products Go To Great Britain In The Form Of Wiltshire Cut Sides

Canadian producers who have any study of the breeding, feeding and marketing of bacon hogs, are sure to realize that our reliable pork products go to England in the form of Wiltshire-cut sides. They have learned that the "Wiltshire" is a trade name given to any carcass of pork which is in a particular manner. A Wiltshire side is simply half of the hog's head and feet cut off, the other half being pulled out, and the hams removed.

Justly these sides are exported from Canada as a pickled or mild state. The smoking operation performed later in England by the wholesalers and distributors, to vary the degree of smoke with a preference of the particular side, is found in a comprehensive publication by the Ministry of Agriculture.

Fig. 1. Relative weight of Fore-end, Gammon, and Middle of a side bacon ham.

Fig. 2. Standard English retail cuts of Wiltshire bacon.

culture and fisheries in England, entitled "A Report on the Pork and Bacon Trades in England and Wales." The three outlines figures reproduced herewith are taken from that report, and are slightly in order to conform with the weights and percentages of Canadian standard bacon hogs and their product.

Figure 1 is of a bacon hog of approximately 200 lbs. live weight. This hog will cut into two Wiltshire sides, each weighing about 60 lbs. In other words, Wiltshires make up 60 per cent. of the live weight of our bacon hogs. After the head and feet are removed the middle of an ideal bacon hog should represent about 50 per cent. of the weight of the side, with the shoulders and hams about balancing.

Figure 2 sets out the relative position of the various retail cuts of the live hog. The comment in the report on these various cuts is interesting and instructive.

"A long and level back is required because the middle of the carcass fetches the highest price per pound and contains the greatest proportion of the entire weight, as will be seen in Figure 1. Cut 'B', known as the 'thick back', contains a relatively heavier proportion of the ribs bones than the remainder of the back; the back fat also tends to be thicker at this point, and further the meat begins to be of the nature of that of the 'collar'. Hence this cut has a lower selling value than the remainder of the back except cut 'D', the loin, when an awkward bone, known as the 'ryder bone', must be removed, which makes slicing difficult and somewhat reduces the value.

"The 'prime back' (cut C), provides the best meat in the side as a whole and is in greatest demand. It is usually the most valuable portion; with the increasing length in the back, which is required to be level, two or three or four back means less weight and less depth of loin. It is important requirement is that a carcass of the back, cut

over the shoulder, should be somewhat arched. Where this section is flat above the shoulder it is excessively fat and consequently heavy in the part. "A straight underline and thickness are essential in the belly, as they denote that the 'thin streaky' and the 'flank' (cuts H and I), will not be thickened and, consequently, thin. When the belly is thick the value of these cuts is increased. The flank has usually a fair proportion of lean, but this does not penetrate deeply. Flank ribs are normally narrow, and if the cut is excessively thin, they become objectionably attenuated when fried. "Thin streaky" suffers from the same disadvantage, but it is normally thicker than the 'flank'. The 'thick streaky' (cut O), depends for quality upon the thickness of the belly at H and I, contains alternate layers of lean and fat, and is of more value than the remainder of the lower cuts on account of its greater thickness and interlarding.

"Breadth, width, and depth to the back are required in the hams, as these features denote plenty of flesh which is highly desirable in a cut

of continued production for the overseas market, the point of quality in the hogs, and thus in the finished product, may in the long run, mean all the difference between an unprofitable or a profitable export bacon trade of considerable proportions."

Should Cultivate Market

Canada could supply all Cranberries People Use Here
Canada consumes a considerable quantity of cranberries annually, and most of them are imported. Yet there is one section of the Dominion, at least, admirably adapted to the cultivation of cranberries and growing them to perfection. Why is it not possible for Canada's cranberry needs to be met by the output of that part of the Dominion, especially as there is a tariff of 20 per cent. ad valorem against the imported berries?

The Canadian cranberries are grown in all three of the Maritime Provinces where there is a large acreage of waste bogs unit for other crops, yet ideally suited to the cultivation of this berry. The fruit is a small, round, red berry, of the size of a pea, and is of a sweet, tart flavor. The fruit is a small, round, red berry, of the size of a pea, and is of a sweet, tart flavor. The fruit is a small, round, red berry, of the size of a pea, and is of a sweet, tart flavor.

In spite of this, from 85,000 to 115,000 25-pound boxes of cranberries are imported into Canada annually and these reach an annual value of from \$220,000 to \$250,000.

If Canada, by reason of climatic conditions, is compelled to rely upon importations of other fruits (if the cranberry may be described in such manner), there is really no reason why she should be dependent upon another country for her supplies of cranberries.

The Maritime Provinces growers have a rare opportunity to take permanent hold of the Canadian market if they are willing to adopt improved packaging and distribution methods and see that only a quality product is placed before the consumer. The Maritime can supply all of the wants of the central part of the Dominion if they choose.

Counts For Something

Cabin Of Britain Is Crises In Stabilizing Force
Whatever our faults and we have been at no pains to conceal them—what force has not been one of them. We have often displayed more confidence in foreigners than they themselves, and more in ourselves than they in us. We have not been responsible for "runs" either on foreign banks or on our own. It is the imponderable cabin which still makes us a stabilizing force in a precarious world deep to the fluctuations of sterling and which counts for more than stocks of gold hoarded great London Morning Post.

Gold mining in Australia is more active than at any time since 1920.

Noted Britishers in Bahamas

"Lightness of the fore-end and shoulder is essential. The 'collar' (cut A), containing overlying muscles and much gristle, is a cheap cut, its value being also reduced by the fact that the shoulder blade is removed prior to curing of the side, and this makes it a difficult cut to slice. The 'foreloft' (cut F), and 'collar' (cut A), are the most disadvantageous as the 'gumion' (cut B), namely an excessive proportion of bone; it also contains much gristle and, next to the 'flank' is the cheapest cut of the side." Figure 3 simply places the cuts which have been described above in relation to the trimmed Wiltshire side. Slight differences in the appearance of some cuts as between Figures 2 and 3 can be accounted for by the fact that when the hog carcass is hung from the rail it naturally stretches out to resemble Figure 3.

From the remarks on the relative retail values of the various cuts it will be seen that swine producers, if they would turn out a product commanding the highest wholesale and retail prices, must continue to do so before than the objective of the bacon type hog—light of shoulder, lengthy between shoulder and ham, with a full lean tapering lean meeting well down towards the back, and with a straight underline denoting fullness and a straight underline denoting fullness.

Now when Canadian hog producers must set themselves to a policy

HIPLINES ARE SMOOTHLY MOULDED AND BEND THESE DAYS

There are definite slimming qualities about this one-piece model in new Princess lines. It has a becoming V-neckline, a fitted bodice, and a back panel effect from neck to hem. It is a slimming garment, and it is a slimming garment, and it is a slimming garment.

A printed silk dress is the original, so youthfully smart now beneath the fur wrap. It will give an economical choice, for it can be worn all winter.

The stunning too in black transparent velvet or deep blue with a soft, supple, cast, cotton-silk crepe silk. Style No. 729 may be had in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, "Local Items"

Th chimney shop at the glass plant, which has been closed down for the past few weeks for repairs to the furnace, commenced operations today. This will add between fifty and twenty hands to the staff.

There as a heavy frost in this district last Tuesday night which did considerable damage to garden stuff. A large field of potatoes and corn in a market garden on the river just east of town was frozen back.

Damage caused by floods which followed week-end cloudbursts in the English Midlands was estimated at more than \$1,000,000. The rain storm, said to have been the worst in 50 years, swept towns and villages in nine counties. Swirling rivers overleaped their banks destroying dwelling and barns and swamping hundreds of square miles of country.

REDCLIFF DOGS TAKE PRIZES AT THE SHOW

At the dog show held in Medicine Hat last Tuesday several Redcliff dogs made a good showing and won prizes.

In the wire haired for terrier class H. Champ's bitch won 1st for best Canadian bred and also for the limit bitch.

In the German Shepherd puppy class R. Schmidt's pup took second prize and also second in the novis class. For the same breed S. McClary's pup took
